

# Cobra X E-MINI NASDAQ Algorithm

## With Machine Learning Technologies

### Description:

**Cobra X E-MINI NASDAQ** is designed for Tradestation and trades in the direction of a strong and well established intra-day trend.

Cobra X does not trade wildly but rather waits for the perfect entry criteria. Entries have machine learning processes that analyses current market conditions to determine the correct entry decision. You can confidently start running this algo live without spending days, weeks, or months testing it in simulation.

We have incorporated proprietary machine learning technologies and utilize EasyLanguage Optimization API to adjust to sudden changes in the market. The result is cutting edge technology that provides great signals.

Cobra X NQ is one of our top strategies and has the tendency to make some pretty big moves. The Cobra X pattern has been in sync with this market for a while and the daily ranges in the NQ are at a sweet spot for this strategy. If you want to simplify your trading, a strategy like Cobra X NQ can do that.

We always recommend starting or adding to a trading system after a drawdown or a series of losers since drawdowns are very normal and cyclical parts of systematic day trading.

Every Trader's strategy should include Automation in today's demanding markets!
